

Design @ Care City

Team Session
26th June 2024

Care City

[carecity.org](https://www.carecity.org)

Aim of today

To unpack where and how design thinking can best benefit Care City (and it's team!)

Why this, now?

Agenda

- 5 Check-in
- 15 High-level: Introducing Design Thinking
- 10 “Why we think we’ve been hired”
- 25 Surfacing opportunities and benefits
- 5 BREAK
- 60 Detailed level: Human-Centred Design steps and tools

Introducing design-thinking

Design thinking: What is it?

To shape better...

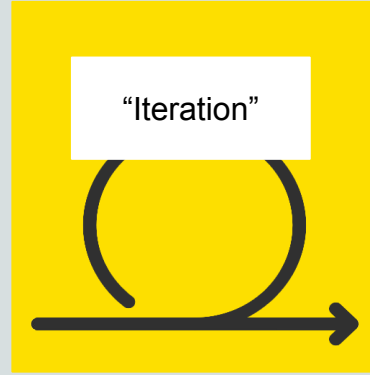

Design thinking: What is it?

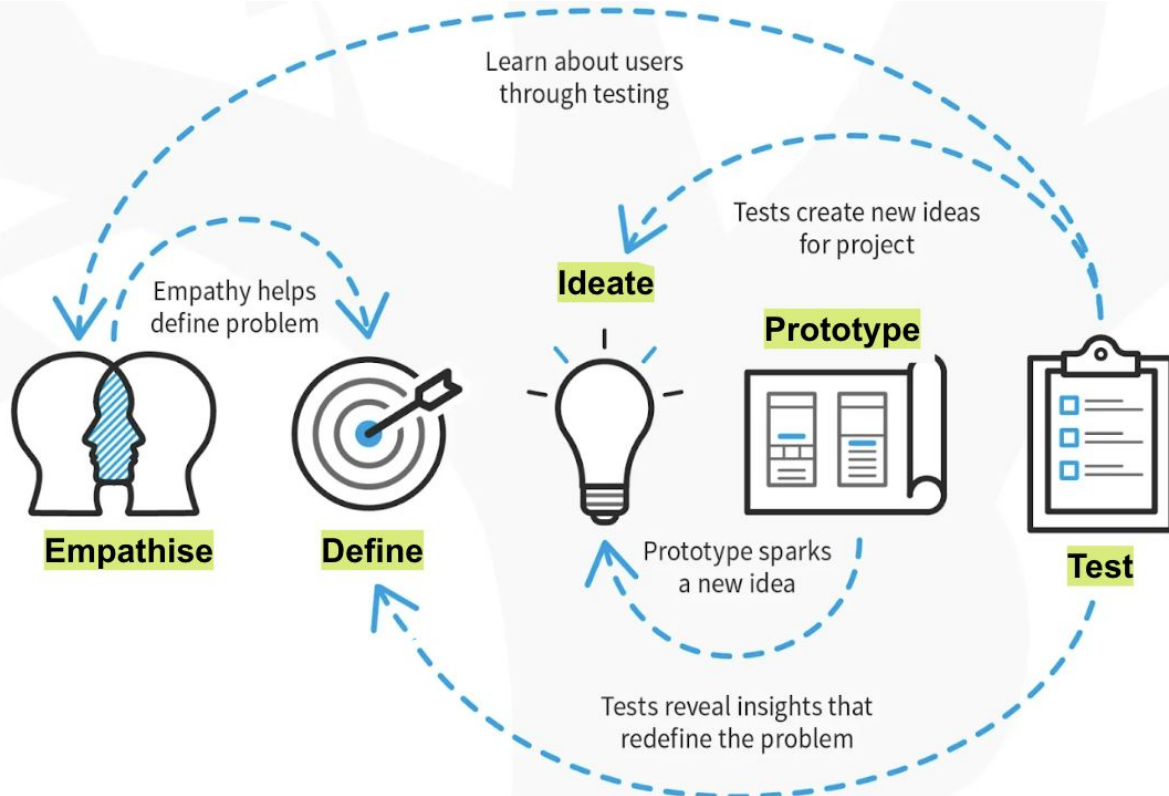

To shape better...

Characterised by

One model - 5 steps

Types of Problems

WICKED

COMPLEX

COMPLICATED

SIMPLE

Greater complexity means:

- Limited evidence on what works to guide us
- Wider range of influences and experiences

SIMPLE

COMPLICATED

COMPLEX

WICKED

1 - Empathise

What is it?

Working to deeply understand “users” and their needs, problems and motivations

How can we do it?

Contextual inquiry

Diary studies

Community researchers

Storytelling

Systems / stakeholder mapping

2 - Define

What is it?

Making sense of observations →
crafting core “problem statements”

What is it?

Who has it?

When and where?

Why does it matter?

How can we do it?

Affinity mapping

Post-it notes! / Miro

Using UX-“artifacts”

3 - Ideate

What is it?

Coming up with solutions to those problems

How can we do it?

Brainstorming techniques

Codesign

Serious play

Inclusive facilitation / prioritization

Collective imagining

4 - Prototype

What is it?

Bringing early ideas to life - creating scaled-down versions of concepts, products or services to showcase and experiment with.

How can we do it?

Low-fi prototyping

Hi-fi prototyping

5 - Test

What is it?

Exploring how well your ideas / prototypes can address identified problems.

How can we do it?

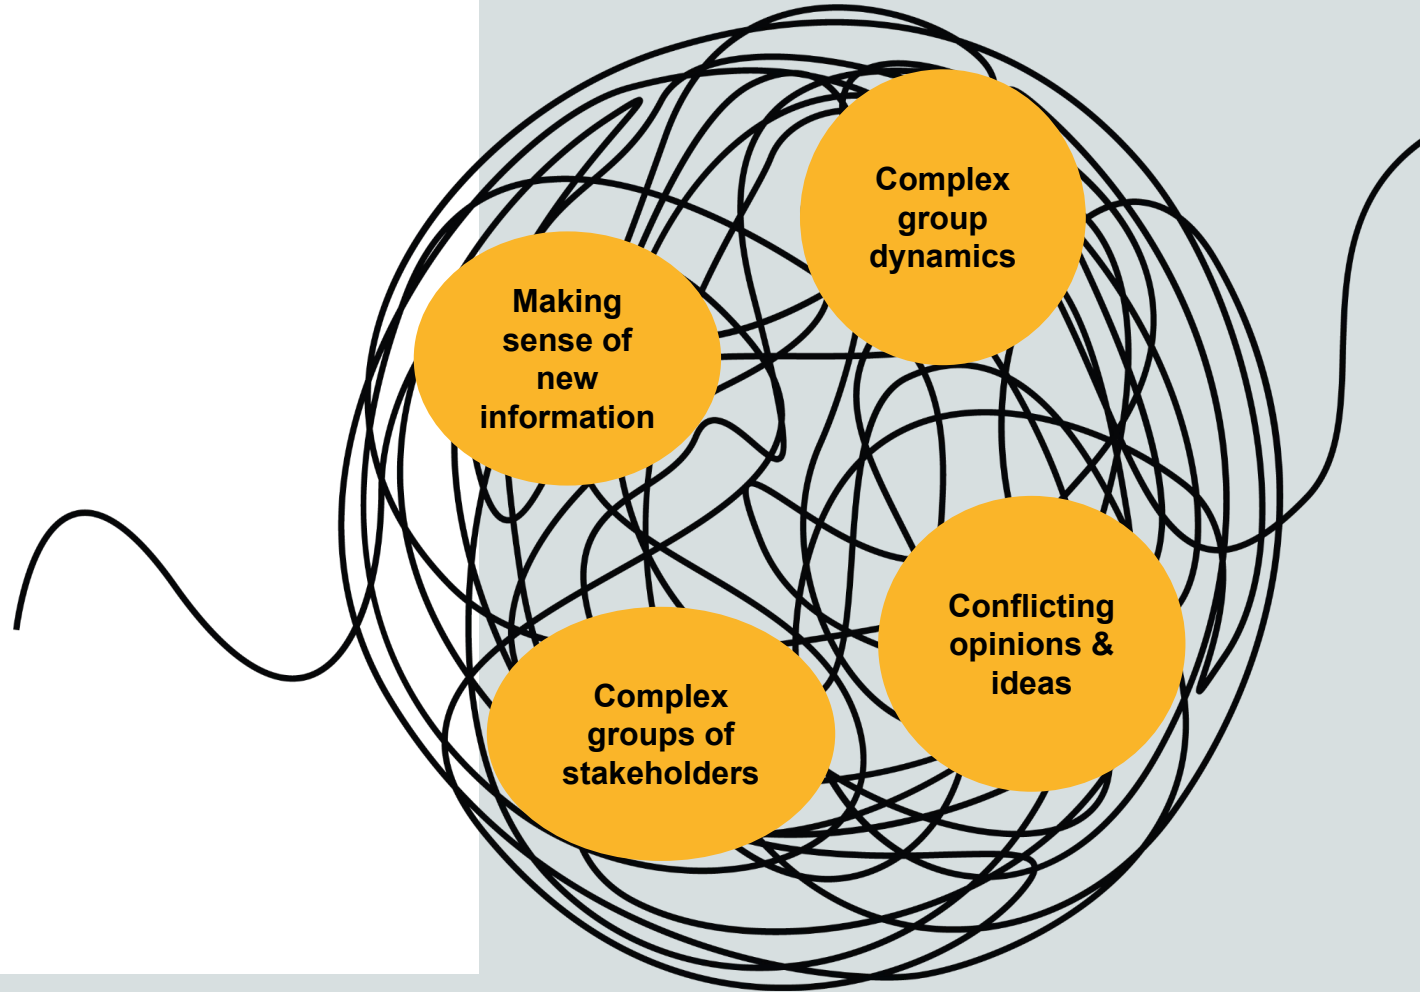

Evaluative interviews

Compare alternatives / prioritize

Observe user engagement

Testing games

v Reality

Why we think we've been hired

What we think...

Opportunities

Ways of working

What we think *you* think...

Help us innovate with **interviews**

Build out **systems-focused** project tools

Professionalise what we're doing

Catalyse pursuit of our new **strategy**

**Now let's challenge
those assumptions**

Empathise Live

On a scale of 1-5, **rate** how skilled you/we are in working through each of the design thinking steps, both individually and as an organisation:

1 = Beginner

5 = Expert

THINK, PAIR, SHARE

Think and add to post-its (5 mins):

1. In which ways do/don't you already approach projects from a design thinking perspective?
2. Where/what you think are the biggest opportunities for **you** or **Care City** to benefit from design thinking?

Pair discussion (7 mins)

Share back (3 mins each)

The Human Centred Design Process: Steps and Tools

1.

How might we develop a coffee maker that brews coffee based on the user's mood, using sensors to detect stress levels and suggesting the perfect coffee blend and strength?

2:

How might we design a smart laundry system that helps people track and reunite lost socks, making laundry day more fun and less frustrating?

3:

How might we design a fun and portable fitness kit that lets people work out anywhere, even in small spaces like an office or apartment?

1.

Know your users

10 mins

1 Who are we empathizing with?

GOAL

2 Who do they need to do?

6 What do they hear?

3 What do they see?

7
What do they think and feel?

Pains

Gains

4 What do they say?

5 What do they do?

2.

Journey Mapping

10 mins

	Awareness	Consideration	Decision	Retention
Objectives				
Actions				
Experience/ Emotion				
Barriers				

3.

Crazy 8s (Ideation)

8 mins

1.

2.

3.

4.

5.

6.

7.

8.

What's shifted for you today?

Tell us one about one prior belief, thought or assumption you had, which you've now revised on the basis of today's session.

What do you think now, instead?

Next steps for us

1. **Synthesise** discussion themes
2. **Reach out** to those absent
3. (You to) **Prioritize** our areas of focus for weeks ahead
